

American Tower Company

Designers & Manufacturers of Communication Towers

Since 1953

Amerite 25 Tower

Now available, the Amerite 25 Tower, using proven solid rod, 'z' cross brace construction. One of the most versatile, economical and dependable towers for self-supporting, bracketed and guyed applications. Designed and manufactured by the American Tower Company, builders of communication towers since 1953 under ISO 9001-2000 manufacturing conditions.

Tower sections have a 12-1/2" face width, 1-1/4" high strength steel tubing legs. Sections are then 'hot dipped' galvanized after welding and fabrication assuring you of a long life finish.

- Each section is 'double bolted' for sturdy and dependable joining.
- Standard 10 foot sections.
- Hot dip galvanized for a long lasting finish (ASTM 123).
- Steel tubing is 50,000 p.s.i. (ASTM A513).
- Manufactured to precise tolerances, assuring you a perfect installation.
- Guyed tower maximum height: 190 feet.¹
- Complete line of accessories for every installation including; base plates, tilt bases, house brackets, wall mounts, adjustable brackets, side arms, roof plates, motor mounts and top configurations.
- Available for a wide variety of applications.

An American company with a long history.

A leading designer and manufacturer of communication towers of all types, since 1953. Today, our state of the art manufacturing, along with years of experience, gives you a tower you can count on today and for years of reliable service.
