Designers & Manufacturers of Communication Towers

Since 1953

## Special Communication Towers

**S-5 Mid**

The Special Tower is a high quality, low in cost tower. A customer favorite by the residential and ham radio users. This tower is quick and easy to erect, easy to climb for maintenance and has long lasting durability.

The Special Tower offers the same strong, die-formed triangular construction which has made all of our towers famous. Made from pre-galvanized US made steel and electrostatically painted to a bright aluminum silver finish.

Compare it with any tower on the market today!

- Each section is 'single bolted' for quick and easy erection.
- Standard 10 foot sections.
- Pre-galvanized 1-1/4" x 16 Gauge US made steel tubing.
- Electrostatically painted to a bright aluminum silver finish.  
\* Powder coated finish is also available to any desired color.
- 3/8" x 1-3/4" zinc plated nuts and bolts.
- Each mid section has 6 "steps" for easy maintenance.
- Engineered to be bracketed or guyed only.<sup>1</sup>
- Complete line of accessories for every installation including; base plates, tilt bases, house brackets, wall mounts, adjustable brackets, side arms, roof plates, motor mounts and top configurations.
- Available for a wide variety of applications including Amateur Radio Stations, Floodlights and Loudspeakers, Wireless and Broadband, UHF and digital TV reception and Communication Radio.
